Executing

After opening the program, the first screen you will see will look like this.

Control camera

The first-person camera will be enabled by default. To move the position of the first-person camera, use the following keys:

W: Forward

A: Left

S: Backward

D: Right

Q: Down

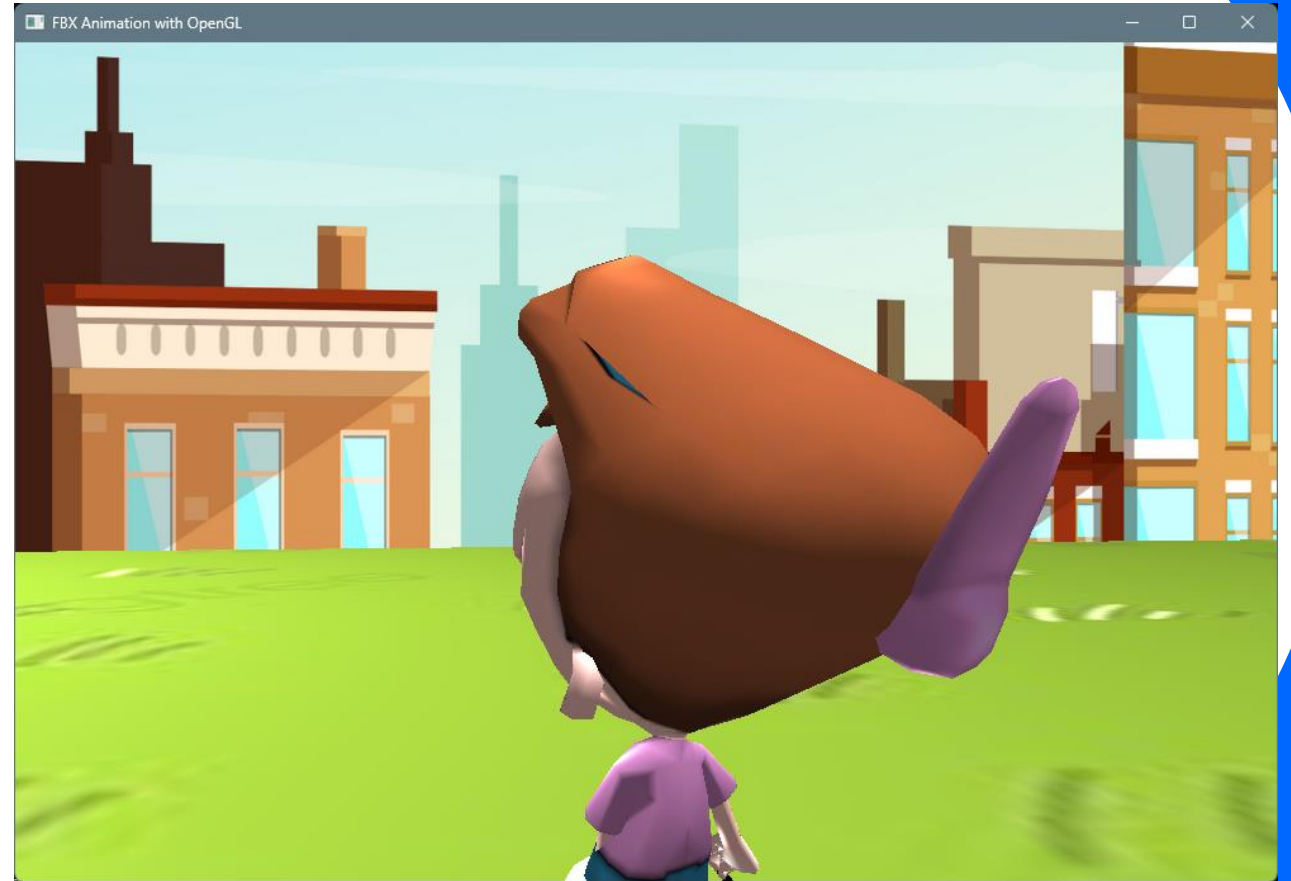

E: Up

Additionally, can control the view of the camera with mouse, and zoom with scroll.

Switch camera

To switch to third-person camera, press the F1 key. To switch back to first-person camera, press the F2 key.

Control character

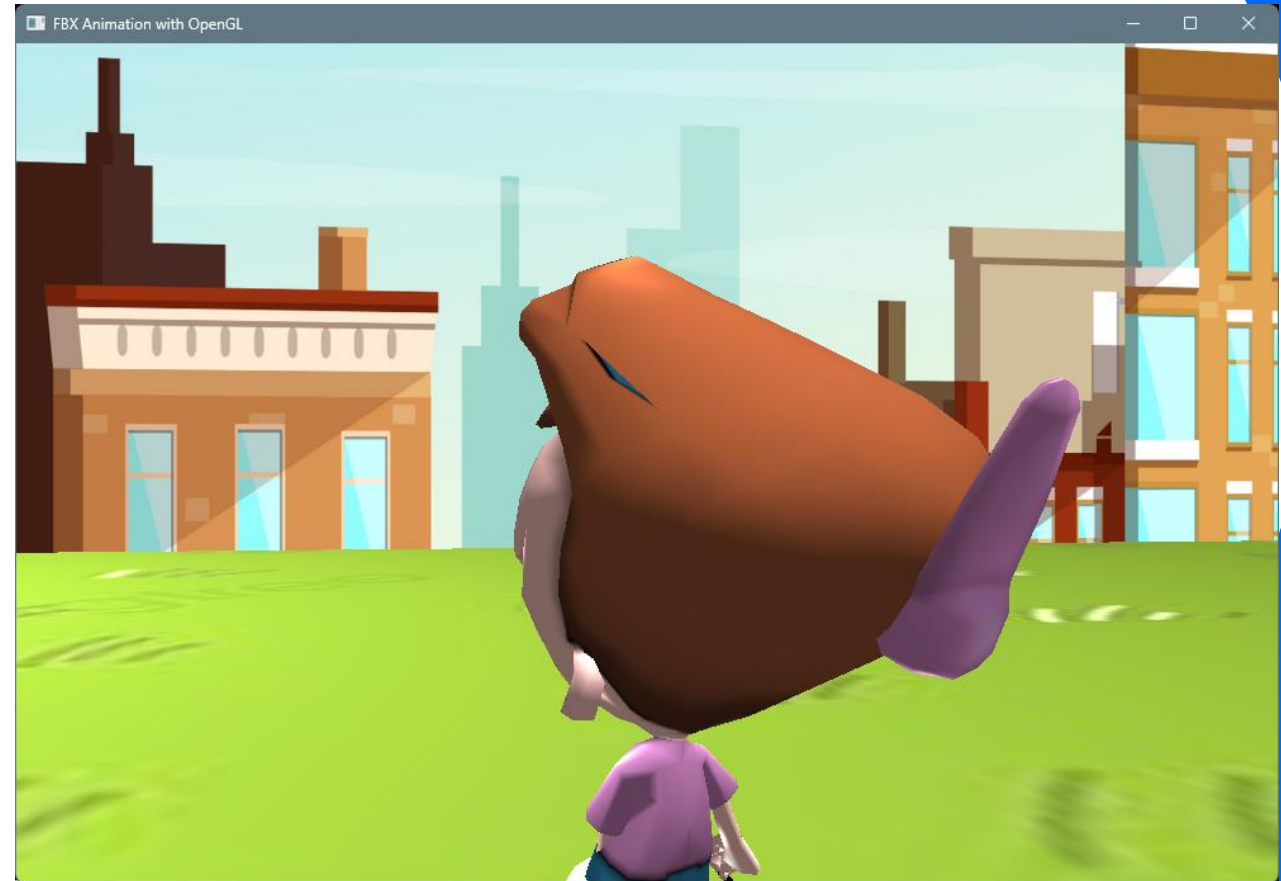

To move the character and control their view, use the following keys:

↑: Forward

↓: Backward

→: Rotate to right

←: Rotate to left

Open the door

To open the door use 'H' key.
To close door use the 'J' key.

Exit program

To quite the program use 'ESC' key

Thank you
